

Professional 360 photo virtual tours for Canadian business and government.

360 Vid Inc., operating as **360 Vid Virtual Tours**, has produced professional 360 **photo** virtual tours since **2014** from our base in Calgary, Alberta, serving organizations across Canada. We are a team of veteran software architects who capture, build, host, and integrate navigable tours, not just photographs. Founder: Benjamin Quesnel.

What sets us apart

The highest-quality 360 capture in Canada

We capture from 4K up to 16K per panorama and beyond on request, matching the grade to the space, so detail is investor-grade and heritage-grade where it earns its keep.

Near-zero operational disruption

No people or tripod in frame, and transient occupants removed in post. No shutdown, no staged walkthrough. Your operations keep running.

Bilingual and multilingual delivery

Tours delivered in English and French, with additional languages on request. A Canadian, bilingual-capable firm.

GPS-anchored, ties into Navisworks and BIM

Presentation-grade 360 layered onto the 3D and LiDAR scan data you may already own.

Clean nadir and zenith, no rig in frame

Tripod, nadir, and zenith artifacts removed from every sphere. Presentation-grade from floor to ceiling.

Captured at any hour, available 24/7

We schedule capture at any hour, including overnight, with enough lead time to be on site. We work around your operations, not the other way around.

Air-gapped, no-cloud delivery

On-premise, single-tenant option for security-sensitive sites. Your facility imagery never leaves your environment.

Built, hosted, and maintained for you

Accessible, schema-rich tours on a maintained Canadian host. Updates and edits handled by our team.

Services

- Custom 360 Virtual Tours
- Google Street View Tours
- Virtual Tour Hosting
- 360 Videography (add-on)
- 360 Photography
- Facility and as-built documentation

Credentials and compliance

- **Insured:** \$5M CGL and E&O
- **WCB covered:** Alberta and Saskatchewan
- **ISN (ISNetworld) registered**
- **WCAG 2.1 AA** accessible delivery
- **Bilingual:** English and French delivery
- **Canadian owned;** data residency optional

Engagement and pricing posture

A single facility starts from **\$7,000**, captured, built, and hosted; hosting from **\$120/month**. Multi-facility public-sector and commercial programs run **\$15k to \$50k+**, scoped per site. Industrial and energy pilots are scoped from **~\$500k**. Most projects are scoped remotely from a recorded walkthrough, so we fit your operations with no site visit required. References available on request.
